

GUIDELINES FOR REVIEWERS

The main purpose of peer reviewing is to secure that international standards of originality and quality are maintained in the knowledge presented.

Peer reviewers' names will not be revealed to the author. All reviewers' identification in files will be eliminated, e.g. in word processing documents.

Manuscript title:

Author:

1. I, the undersigned, a specialist on the subject matter this manuscript deals with (whole book, article or chapter), have read it thoroughly. My overall assessment is that it is (mark one):
 - Fit for publication
 - Fit for publications with revisions suggested
 - Unfit for publication
2. State the academic importance and originality of the work.
3. State the academic limitations, if any.
4. State false claims or inadequate arguments, if any, and give page references.
5. State the subjects/sections in the manuscript that need to be amended in order to make it fit for publication, if any (please give page references).
